AYUR PULLE

82 Prothero Road, SW6 7LZ
Fulham, London
ayurpulle.2004@gmail.com 07731335351

EDUCATION

Iliad **San Francisco, US**
Intensive Participant *October 2026*

- Selected to participate in a one month, fully funded, intensive course in AI Safety and Alignment in SF
- Topics of study include Reinforcement and Deep Learning theory, Mechanistic Interpretability, Transformer Architectures, Theories of Alignment
- The Intensive is designed to help mathematicians and physicists transition into technical AI Safety and Alignment

Imperial College London **London, UK**
Masters of Science, Physics and Quantum Dynamics *Oct 2026 - Oct 2027*

- Specialist Master's course focused on Quantum Theory and Computing
- Modules include Quantum Information, Advanced Quantum Information, Quantum Optics, Scientific Computing, Generative AI for Science

Imperial College London **London, UK**
Bachelor of Science, Physics with Theoretical Physics *Sep 2023 - Jun 2026*

- First Class Honours, 79% Final year average
- Bachelor's Thesis on Modular Architecures in Neutral Atom and Trapped Ion Quantum Computers

CAREER/EXPERIENCE

Dovetail Research **London, UK / Remote**
Research Fellow *June - Aug 2026*

- Conducting research in Agent foundations under an ARIA grant
- Focused on creating a rigorous mathematical foundation for agent behaviour, particularly what a competent agent must know about it's world

Imperial College London **London, UK**
Research Intern *July - Sep 2025*

- Research in Quantum Optics under supervision of Dr Raj Patel
- Designed sensing protocols for Quantum Metrology with GKP States
- Developed adaptive and non-adaptive protocols to try and demonstrate quantum advantage with current linear optics limitations

Hexcell **London, UK**
AI/ML Intern *July - September 2024*

- Worked on building a small language model for use of engineers, trained on heat exchanger physics
- Contributed to proprietary software solutions under confidentiality agreement

LEADERSHIP & PROJECTS

Bachelors Thesis **London, UK**
Unviversity Project *Sep 2025 - Jan 2026*

- Thesis on Modular Architectures for Trapped Ion and Neutral Atom Quantum Computing
- Research into scalability of Quantum Computers and how to network them effectively

ADDITIONAL INFORMATION

Skills:	Python, Machine Learning (SciPy, PyTorch, Strawberry Fields), Conversational French
Awards:	Gold awards in Physics Olympiads and Mathematics challenges, Science award for school research project on Loop Quantum Gravity
Interests:	Poker, Water Polo, Political Philosophy
